## INSIDE

### Revisiting the opening day of ETAPS 2024

#### First day of ETAPS 2024

Greetings to all attendees of ETAPS 2024! We hope you enjoyed the first day of the main event. Lars Birkedal delivered an exciting keynote speech about higher-order probabilistic relational separation logic and Iris. The day was then filled with presentations at TACAS and FACE; and the SV-COMP and Rust Verification Workshop. The afternoon sessions included a diversity and inclusion event and an invited tutorial by David Monniaux. The day concluded with a guided walking tour, exploring the historic sights of Luxembourg City, and a welcome reception at the Big Beer Company, Clausen. We hope you enjoyed the day's activities and look forward to the many more exciting events planned for Tuesday!
